Replace [PLACEHOLDERS] with your project details. Add footage, transcript, duration, platform, and reference style for stronger results.

Video Editing

1. Professional edit plan

Act as a senior video editor. Create a complete editing plan for [FOOTAGE/PROJECT] including shot order, selects, cuts, pacing, transitions, B-roll, music, SFX, captions, color treatment, and export settings.

2. Rough cut structure

Turn this footage description/transcript [INPUT] into a professional rough-cut structure. Identify what to keep, remove, shorten, rearrange, and emphasize.

3. Shot selection

Review this shot list [SHOTS] and rank each shot as hero, supporting, B-roll, transition, or discard. Explain the editorial reason.

4. B-roll plan

Create a detailed B-roll plan for [VIDEO/TOPIC]. For every section, suggest visuals, duration, movement, framing, and where the B-roll should replace talking-head footage.

5. Transition strategy

Create a restrained professional transition plan for [VIDEO]. Specify where to use cuts, match cuts, whip transitions, dissolves, speed ramps, and when to avoid transitions.

6. Cinematic pacing

Create a cinematic pacing map for [VIDEO LENGTH] using shot-duration ranges, pauses, pattern interrupts, music changes, and emotional beats.

7. Interview edit

Turn this interview transcript [TRANSCRIPT] into a compelling edit. Select the strongest statements, remove repetition, create narrative flow, and suggest B-roll.

8. Talking-head edit

Create a professional talking-head editing recipe for [TOPIC] including jump-cut strategy, punch-ins, B-roll, captions, music, SFX, and pacing.

9. Montage edit

Design a high-energy montage for [EVENT/PROJECT] with shot order, cut rhythm, music cues, speed changes, and visual transitions.

10. Story edit

Build a beginning-middle-end narrative from this footage [DESCRIPTION]. Identify the hook, setup, conflict/problem, transformation, payoff, and ending.

11. Professional edit plan — Variation 2

Act as a senior video editor. Create a complete editing plan for [FOOTAGE/PROJECT] including shot order, selects, cuts, pacing, transitions, B-roll, music, SFX, captions, color treatment, and export settings. Make the edit feel premium, natural, and commercially polished.

12. Rough cut structure — Variation 2

Turn this footage description/transcript [INPUT] into a professional rough-cut structure. Identify what to keep, remove, shorten, rearrange, and emphasize. Optimize the edit for mobile viewing and strong retention.

13. Shot selection — Variation 2

Review this shot list [SHOTS] and rank each shot as hero, supporting, B-roll, transition, or discard. Explain the editorial reason. Keep the style realistic and avoid excessive transitions or effects.

14. B-roll plan — Variation 2

Create a detailed B-roll plan for [VIDEO/TOPIC]. For every section, suggest visuals, duration, movement, framing, and where the B-roll should replace talking-head footage. Include precise timing guidance and a practical workflow for the editor.

15. Transition strategy — Variation 2

Create a restrained professional transition plan for [VIDEO]. Specify where to use cuts, match cuts, whip transitions, dissolves, speed ramps, and when to avoid transitions. Make the result suitable for a professional client deliverable.

16. Cinematic pacing — Variation 2

Create a cinematic pacing map for [VIDEO LENGTH] using shot-duration ranges, pauses, pattern interrupts, music changes, and emotional beats. Make the edit feel premium, natural, and commercially polished.

17. Interview edit — Variation 2

Turn this interview transcript [TRANSCRIPT] into a compelling edit. Select the strongest statements, remove repetition, create narrative flow, and suggest B-roll. Optimize the edit for mobile viewing and strong retention.

18. Talking-head edit — Variation 2

Create a professional talking-head editing recipe for [TOPIC] including jump-cut strategy, punch-ins, B-roll, captions, music, SFX, and pacing. Keep the style realistic and avoid excessive transitions or effects.

19. Montage edit — Variation 2

Design a high-energy montage for [EVENT/PROJECT] with shot order, cut rhythm, music cues, speed changes, and visual transitions. Include precise timing guidance and a practical workflow for the editor.

20. Story edit — Variation 2

Build a beginning-middle-end narrative from this footage [DESCRIPTION]. Identify the hook, setup, conflict/problem, transformation, payoff, and ending. Make the result suitable for a professional client deliverable.

21. Professional edit plan — Variation 3

Act as a senior video editor. Create a complete editing plan for [FOOTAGE/PROJECT] including shot order, selects, cuts, pacing, transitions, B-roll, music, SFX, captions, color treatment, and export settings. Make the edit feel premium, natural, and commercially polished.

22. Rough cut structure — Variation 3

Turn this footage description/transcript [INPUT] into a professional rough-cut structure. Identify what to keep, remove, shorten, rearrange, and emphasize. Optimize the edit for mobile viewing and strong retention.

23. Shot selection — Variation 3

Review this shot list [SHOTS] and rank each shot as hero, supporting, B-roll, transition, or discard. Explain the editorial reason. Keep the style realistic and avoid excessive transitions or effects.

24. B-roll plan — Variation 3

Create a detailed B-roll plan for [VIDEO/TOPIC]. For every section, suggest visuals, duration, movement, framing, and where the B-roll should replace talking-head footage. Include precise timing guidance and a practical workflow for the editor.

25. Transition strategy — Variation 3

Create a restrained professional transition plan for [VIDEO]. Specify where to use cuts, match cuts, whip transitions, dissolves, speed ramps, and when to avoid transitions. Make the result suitable for a professional client deliverable.

26. Cinematic pacing — Variation 3

Create a cinematic pacing map for [VIDEO LENGTH] using shot-duration ranges, pauses, pattern interrupts, music changes, and emotional beats. Make the edit feel premium, natural, and commercially polished.

27. Interview edit — Variation 3

Turn this interview transcript [TRANSCRIPT] into a compelling edit. Select the strongest statements, remove repetition, create narrative flow, and suggest B-roll. Optimize the edit for mobile viewing and strong retention.

28. Talking-head edit — Variation 3

Create a professional talking-head editing recipe for [TOPIC] including jump-cut strategy, punch-ins, B-roll, captions, music, SFX, and pacing. Keep the style realistic and avoid excessive transitions or effects.

29. Montage edit — Variation 3

Design a high-energy montage for [EVENT/PROJECT] with shot order, cut rhythm, music cues, speed changes, and visual transitions. Include precise timing guidance and a practical workflow for the editor.

30. Story edit — Variation 3

Build a beginning-middle-end narrative from this footage [DESCRIPTION]. Identify the hook, setup, conflict/problem, transformation, payoff, and ending. Make the result suitable for a professional client deliverable.

31. Professional edit plan — Variation 4

Act as a senior video editor. Create a complete editing plan for [FOOTAGE/PROJECT] including shot order, selects, cuts, pacing, transitions, B-roll, music, SFX, captions, color treatment, and export settings. Make the edit feel premium, natural, and commercially polished.

32. Rough cut structure — Variation 4

Turn this footage description/transcript [INPUT] into a professional rough-cut structure. Identify what to keep, remove, shorten, rearrange, and emphasize. Optimize the edit for mobile viewing and strong retention.

33. Shot selection — Variation 4

Review this shot list [SHOTS] and rank each shot as hero, supporting, B-roll, transition, or discard. Explain the editorial reason. Keep the style realistic and avoid excessive transitions or effects.

34. B-roll plan — Variation 4

Create a detailed B-roll plan for [VIDEO/TOPIC]. For every section, suggest visuals, duration, movement, framing, and where the B-roll should replace talking-head footage. Include precise timing guidance and a practical workflow for the editor.

35. Transition strategy — Variation 4

Create a restrained professional transition plan for [VIDEO]. Specify where to use cuts, match cuts, whip transitions, dissolves, speed ramps, and when to avoid transitions. Make the result suitable for a professional client deliverable.

36. Cinematic pacing — Variation 4

Create a cinematic pacing map for [VIDEO LENGTH] using shot-duration ranges, pauses, pattern interrupts, music changes, and emotional beats. Make the edit feel premium, natural, and commercially polished.

37. Interview edit — Variation 4

Turn this interview transcript [TRANSCRIPT] into a compelling edit. Select the strongest statements, remove repetition, create narrative flow, and suggest B-roll. Optimize the edit for mobile viewing and strong retention.

38. Talking-head edit — Variation 4

Create a professional talking-head editing recipe for [TOPIC] including jump-cut strategy, punch-ins, B-roll, captions, music, SFX, and pacing. Keep the style realistic and avoid excessive transitions or effects.

39. Montage edit — Variation 4

Design a high-energy montage for [EVENT/PROJECT] with shot order, cut rhythm, music cues, speed changes, and visual transitions. Include precise timing guidance and a practical workflow for the editor.

40. Story edit — Variation 4

Build a beginning-middle-end narrative from this footage [DESCRIPTION]. Identify the hook, setup, conflict/problem, transformation, payoff, and ending. Make the result suitable for a professional client deliverable.

41. Professional edit plan — Variation 5

Act as a senior video editor. Create a complete editing plan for [FOOTAGE/PROJECT] including shot order, selects, cuts, pacing, transitions, B-roll, music, SFX, captions, color treatment, and export settings. Make the edit feel premium, natural, and commercially polished.

42. Rough cut structure — Variation 5

Turn this footage description/transcript [INPUT] into a professional rough-cut structure. Identify what to keep, remove, shorten, rearrange, and emphasize. Optimize the edit for mobile viewing and strong retention.

43. Shot selection — Variation 5

Review this shot list [SHOTS] and rank each shot as hero, supporting, B-roll, transition, or discard. Explain the editorial reason. Keep the style realistic and avoid excessive transitions or effects.

44. B-roll plan — Variation 5

Create a detailed B-roll plan for [VIDEO/TOPIC]. For every section, suggest visuals, duration, movement, framing, and where the B-roll should replace talking-head footage. Include precise timing guidance and a practical workflow for the editor.

45. Transition strategy — Variation 5

Create a restrained professional transition plan for [VIDEO]. Specify where to use cuts, match cuts, whip transitions, dissolves, speed ramps, and when to avoid transitions. Make the result suitable for a professional client deliverable.

46. Cinematic pacing — Variation 5

Create a cinematic pacing map for [VIDEO LENGTH] using shot-duration ranges, pauses, pattern interrupts, music changes, and emotional beats. Make the edit feel premium, natural, and commercially polished.

47. Interview edit — Variation 5

Turn this interview transcript [TRANSCRIPT] into a compelling edit. Select the strongest statements, remove repetition, create narrative flow, and suggest B-roll. Optimize the edit for mobile viewing and strong retention.

48. Talking-head edit — Variation 5

Create a professional talking-head editing recipe for [TOPIC] including jump-cut strategy, punch-ins, B-roll, captions, music, SFX, and pacing. Keep the style realistic and avoid excessive transitions or effects.

49. Montage edit — Variation 5

Design a high-energy montage for [EVENT/PROJECT] with shot order, cut rhythm, music cues, speed changes, and visual transitions. Include precise timing guidance and a practical workflow for the editor.

50. Story edit — Variation 5

Build a beginning-middle-end narrative from this footage [DESCRIPTION]. Identify the hook, setup, conflict/problem, transformation, payoff, and ending. Make the result suitable for a professional client deliverable.

51. Professional edit plan — Variation 6

Act as a senior video editor. Create a complete editing plan for [FOOTAGE/PROJECT] including shot order, selects, cuts, pacing, transitions, B-roll, music, SFX, captions, color treatment, and export settings. Make the edit feel premium, natural, and commercially polished.

52. Rough cut structure — Variation 6

Turn this footage description/transcript [INPUT] into a professional rough-cut structure. Identify what to keep, remove, shorten, rearrange, and emphasize. Optimize the edit for mobile viewing and strong retention.

53. Shot selection — Variation 6

Review this shot list [SHOTS] and rank each shot as hero, supporting, B-roll, transition, or discard. Explain the editorial reason. Keep the style realistic and avoid excessive transitions or effects.

54. B-roll plan — Variation 6

Create a detailed B-roll plan for [VIDEO/TOPIC]. For every section, suggest visuals, duration, movement, framing, and where the B-roll should replace talking-head footage. Include precise timing guidance and a practical workflow for the editor.

55. Transition strategy — Variation 6

Create a restrained professional transition plan for [VIDEO]. Specify where to use cuts, match cuts, whip transitions, dissolves, speed ramps, and when to avoid transitions. Make the result suitable for a professional client deliverable.

56. Cinematic pacing — Variation 6

Create a cinematic pacing map for [VIDEO LENGTH] using shot-duration ranges, pauses, pattern interrupts, music changes, and emotional beats. Make the edit feel premium, natural, and commercially polished.

57. Interview edit — Variation 6

Turn this interview transcript [TRANSCRIPT] into a compelling edit. Select the strongest statements, remove repetition, create narrative flow, and suggest B-roll. Optimize the edit for mobile viewing and strong retention.

58. Talking-head edit — Variation 6

Create a professional talking-head editing recipe for [TOPIC] including jump-cut strategy, punch-ins, B-roll, captions, music, SFX, and pacing. Keep the style realistic and avoid excessive transitions or effects.

59. Montage edit — Variation 6

Design a high-energy montage for [EVENT/PROJECT] with shot order, cut rhythm, music cues, speed changes, and visual transitions. Include precise timing guidance and a practical workflow for the editor.

60. Story edit — Variation 6

Build a beginning-middle-end narrative from this footage [DESCRIPTION]. Identify the hook, setup, conflict/problem, transformation, payoff, and ending. Make the result suitable for a professional client deliverable.

61. Professional edit plan — Variation 7

Act as a senior video editor. Create a complete editing plan for [FOOTAGE/PROJECT] including shot order, selects, cuts, pacing, transitions, B-roll, music, SFX, captions, color treatment, and export settings. Make the edit feel premium, natural, and commercially polished.

62. Rough cut structure — Variation 7

Turn this footage description/transcript [INPUT] into a professional rough-cut structure. Identify what to keep, remove, shorten, rearrange, and emphasize. Optimize the edit for mobile viewing and strong retention.

63. Shot selection — Variation 7

Review this shot list [SHOTS] and rank each shot as hero, supporting, B-roll, transition, or discard. Explain the editorial reason. Keep the style realistic and avoid excessive transitions or effects.

64. B-roll plan — Variation 7

Create a detailed B-roll plan for [VIDEO/TOPIC]. For every section, suggest visuals, duration, movement, framing, and where the B-roll should replace talking-head footage. Include precise timing guidance and a practical workflow for the editor.

65. Transition strategy — Variation 7

Create a restrained professional transition plan for [VIDEO]. Specify where to use cuts, match cuts, whip transitions, dissolves, speed ramps, and when to avoid transitions. Make the result suitable for a professional client deliverable.

66. Cinematic pacing — Variation 7

Create a cinematic pacing map for [VIDEO LENGTH] using shot-duration ranges, pauses, pattern interrupts, music changes, and emotional beats. Make the edit feel premium, natural, and commercially polished.

67. Interview edit — Variation 7

Turn this interview transcript [TRANSCRIPT] into a compelling edit. Select the strongest statements, remove repetition, create narrative flow, and suggest B-roll. Optimize the edit for mobile viewing and strong retention.

68. Talking-head edit — Variation 7

Create a professional talking-head editing recipe for [TOPIC] including jump-cut strategy, punch-ins, B-roll, captions, music, SFX, and pacing. Keep the style realistic and avoid excessive transitions or effects.

69. Montage edit — Variation 7

Design a high-energy montage for [EVENT/PROJECT] with shot order, cut rhythm, music cues, speed changes, and visual transitions. Include precise timing guidance and a practical workflow for the editor.

70. Story edit — Variation 7

Build a beginning-middle-end narrative from this footage [DESCRIPTION]. Identify the hook, setup, conflict/problem, transformation, payoff, and ending. Make the result suitable for a professional client deliverable.

71. Professional edit plan — Variation 8

Act as a senior video editor. Create a complete editing plan for [FOOTAGE/PROJECT] including shot order, selects, cuts, pacing, transitions, B-roll, music, SFX, captions, color treatment, and export settings. Make the edit feel premium, natural, and commercially polished.

72. Rough cut structure — Variation 8

Turn this footage description/transcript [INPUT] into a professional rough-cut structure. Identify what to keep, remove, shorten, rearrange, and emphasize. Optimize the edit for mobile viewing and strong retention.

73. Shot selection — Variation 8

Review this shot list [SHOTS] and rank each shot as hero, supporting, B-roll, transition, or discard. Explain the editorial reason. Keep the style realistic and avoid excessive transitions or effects.

74. B-roll plan — Variation 8

Create a detailed B-roll plan for [VIDEO/TOPIC]. For every section, suggest visuals, duration, movement, framing, and where the B-roll should replace talking-head footage. Include precise timing guidance and a practical workflow for the editor.

75. Transition strategy — Variation 8

Create a restrained professional transition plan for [VIDEO]. Specify where to use cuts, match cuts, whip transitions, dissolves, speed ramps, and when to avoid transitions. Make the result suitable for a professional client deliverable.

76. Cinematic pacing — Variation 8

Create a cinematic pacing map for [VIDEO LENGTH] using shot-duration ranges, pauses, pattern interrupts, music changes, and emotional beats. Make the edit feel premium, natural, and commercially polished.

77. Interview edit — Variation 8

Turn this interview transcript [TRANSCRIPT] into a compelling edit. Select the strongest statements, remove repetition, create narrative flow, and suggest B-roll. Optimize the edit for mobile viewing and strong retention.

78. Talking-head edit — Variation 8

Create a professional talking-head editing recipe for [TOPIC] including jump-cut strategy, punch-ins, B-roll, captions, music, SFX, and pacing. Keep the style realistic and avoid excessive transitions or effects.

79. Montage edit — Variation 8

Design a high-energy montage for [EVENT/PROJECT] with shot order, cut rhythm, music cues, speed changes, and visual transitions. Include precise timing guidance and a practical workflow for the editor.

80. Story edit — Variation 8

Build a beginning-middle-end narrative from this footage [DESCRIPTION]. Identify the hook, setup, conflict/problem, transformation, payoff, and ending. Make the result suitable for a professional client deliverable.

81. Professional edit plan — Variation 9

Act as a senior video editor. Create a complete editing plan for [FOOTAGE/PROJECT] including shot order, selects, cuts, pacing, transitions, B-roll, music, SFX, captions, color treatment, and export settings. Make the edit feel premium, natural, and commercially polished.

82. Rough cut structure — Variation 9

Turn this footage description/transcript [INPUT] into a professional rough-cut structure. Identify what to keep, remove, shorten, rearrange, and emphasize. Optimize the edit for mobile viewing and strong retention.

83. Shot selection — Variation 9

Review this shot list [SHOTS] and rank each shot as hero, supporting, B-roll, transition, or discard. Explain the editorial reason. Keep the style realistic and avoid excessive transitions or effects.

84. B-roll plan — Variation 9

Create a detailed B-roll plan for [VIDEO/TOPIC]. For every section, suggest visuals, duration, movement, framing, and where the B-roll should replace talking-head footage. Include precise timing guidance and a practical workflow for the editor.

85. Transition strategy — Variation 9

Create a restrained professional transition plan for [VIDEO]. Specify where to use cuts, match cuts, whip transitions, dissolves, speed ramps, and when to avoid transitions. Make the result suitable for a professional client deliverable.

86. Cinematic pacing — Variation 9

Create a cinematic pacing map for [VIDEO LENGTH] using shot-duration ranges, pauses, pattern interrupts, music changes, and emotional beats. Make the edit feel premium, natural, and commercially polished.

87. Interview edit — Variation 9

Turn this interview transcript [TRANSCRIPT] into a compelling edit. Select the strongest statements, remove repetition, create narrative flow, and suggest B-roll. Optimize the edit for mobile viewing and strong retention.

88. Talking-head edit — Variation 9

Create a professional talking-head editing recipe for [TOPIC] including jump-cut strategy, punch-ins, B-roll, captions, music, SFX, and pacing. Keep the style realistic and avoid excessive transitions or effects.

89. Montage edit — Variation 9

Design a high-energy montage for [EVENT/PROJECT] with shot order, cut rhythm, music cues, speed changes, and visual transitions. Include precise timing guidance and a practical workflow for the editor.

90. Story edit — Variation 9

Build a beginning-middle-end narrative from this footage [DESCRIPTION]. Identify the hook, setup, conflict/problem, transformation, payoff, and ending. Make the result suitable for a professional client deliverable.

91. Professional edit plan — Variation 10

Act as a senior video editor. Create a complete editing plan for [FOOTAGE/PROJECT] including shot order, selects, cuts, pacing, transitions, B-roll, music, SFX, captions, color treatment, and export settings. Make the edit feel premium, natural, and commercially polished.

92. Rough cut structure — Variation 10

Turn this footage description/transcript [INPUT] into a professional rough-cut structure. Identify what to keep, remove, shorten, rearrange, and emphasize. Optimize the edit for mobile viewing and strong retention.

93. Shot selection — Variation 10

Review this shot list [SHOTS] and rank each shot as hero, supporting, B-roll, transition, or discard. Explain the editorial reason. Keep the style realistic and avoid excessive transitions or effects.

94. B-roll plan — Variation 10

Create a detailed B-roll plan for [VIDEO/TOPIC]. For every section, suggest visuals, duration, movement, framing, and where the B-roll should replace talking-head footage. Include precise timing guidance and a practical workflow for the editor.

95. Transition strategy — Variation 10

Create a restrained professional transition plan for [VIDEO]. Specify where to use cuts, match cuts, whip transitions, dissolves, speed ramps, and when to avoid transitions. Make the result suitable for a professional client deliverable.

96. Cinematic pacing — Variation 10

Create a cinematic pacing map for [VIDEO LENGTH] using shot-duration ranges, pauses, pattern interrupts, music changes, and emotional beats. Make the edit feel premium, natural, and commercially polished.

97. Interview edit — Variation 10

Turn this interview transcript [TRANSCRIPT] into a compelling edit. Select the strongest statements, remove repetition, create narrative flow, and suggest B-roll. Optimize the edit for mobile viewing and strong retention.

98. Talking-head edit — Variation 10

Create a professional talking-head editing recipe for [TOPIC] including jump-cut strategy, punch-ins, B-roll, captions, music, SFX, and pacing. Keep the style realistic and avoid excessive transitions or effects.

99. Montage edit — Variation 10

Design a high-energy montage for [EVENT/PROJECT] with shot order, cut rhythm, music cues, speed changes, and visual transitions. Include precise timing guidance and a practical workflow for the editor.

100. Story edit — Variation 10

Build a beginning-middle-end narrative from this footage [DESCRIPTION]. Identify the hook, setup, conflict/problem, transformation, payoff, and ending. Make the result suitable for a professional client deliverable.

Reels & Shorts

101. Viral short edit

Create a 30-second short-form editing plan for [TOPIC] with a 2-second hook, rapid visual changes, captions, B-roll, pattern interrupts, and CTA.

102. 15-second reel

Create a 15-second Reel edit using [FOOTAGE]. Specify exact timing, cuts, text overlays, music beats, and ending.

103. 30-second reel

Create a 30-second Instagram Reel editing blueprint for [TOPIC] designed for retention and clarity.

104. Before-after reel

Create an engaging before-and-after edit for [TRANSFORMATION]. Include hook, reveal timing, sound design, captions, and CTA.

105. Product reel

Create a premium product Reel edit for [PRODUCT] with macro shots, detail cuts, music rhythm, text overlays, and a strong final product reveal.

106. Talking-head short

Edit a talking-head short about [TOPIC] with jump cuts, punch-ins, animated captions, B-roll, and pattern interrupts.

107. Trend adaptation

Adapt [TREND/FORMAT] into a professional short for [BRAND] without copying another creator's exact content.

108. Fast-paced edit

Create a fast-paced editing blueprint for [TOPIC] using cuts every [X] seconds, visual resets, zooms, B-roll, and sound effects.

109. Educational short

Edit an educational Reel about [TOPIC] so viewers understand the key idea quickly. Include hook, visual examples, captions, and recap.

110. Story Reel

Turn this story [STORY] into a 30–45 second Reel with emotional pacing, visual beats, captions, music, and payoff.

111. Viral short edit — Variation 2

Create a 30-second short-form editing plan for [TOPIC] with a 2-second hook, rapid visual changes, captions, B-roll, pattern interrupts, and CTA. Make the edit feel premium, natural, and commercially polished.

112. 15-second reel — Variation 2

Create a 15-second Reel edit using [FOOTAGE]. Specify exact timing, cuts, text overlays, music beats, and ending. Optimize the edit for mobile viewing and strong retention.

113. 30-second reel — Variation 2

Create a 30-second Instagram Reel editing blueprint for [TOPIC] designed for retention and clarity. Keep the style realistic and avoid excessive transitions or effects.

114. Before-after reel — Variation 2

Create an engaging before-and-after edit for [TRANSFORMATION]. Include hook, reveal timing, sound design, captions, and CTA. Include precise timing guidance and a practical workflow for the editor.

115. Product reel — Variation 2

Create a premium product Reel edit for [PRODUCT] with macro shots, detail cuts, music rhythm, text overlays, and a strong final product reveal. Make the result suitable for a professional client deliverable.

116. Talking-head short — Variation 2

Edit a talking-head short about [TOPIC] with jump cuts, punch-ins, animated captions, B-roll, and pattern interrupts. Make the edit feel premium, natural, and commercially polished.

117. Trend adaptation — Variation 2

Adapt [TREND/FORMAT] into a professional short for [BRAND] without copying another creator's exact content. Optimize the edit for mobile viewing and strong retention.

118. Fast-paced edit — Variation 2

Create a fast-paced editing blueprint for [TOPIC] using cuts every [X] seconds, visual resets, zooms, B-roll, and sound effects. Keep the style realistic and avoid excessive transitions or effects.

119. Educational short — Variation 2

Edit an educational Reel about [TOPIC] so viewers understand the key idea quickly. Include hook, visual examples, captions, and recap. Include precise timing guidance and a practical workflow for the editor.

120. Story Reel — Variation 2

Turn this story [STORY] into a 30–45 second Reel with emotional pacing, visual beats, captions, music, and payoff. Make the result suitable for a professional client deliverable.

121. Viral short edit — Variation 3

Create a 30-second short-form editing plan for [TOPIC] with a 2-second hook, rapid visual changes, captions, B-roll, pattern interrupts, and CTA. Make the edit feel premium, natural, and commercially polished.

122. 15-second reel — Variation 3

Create a 15-second Reel edit using [FOOTAGE]. Specify exact timing, cuts, text overlays, music beats, and ending. Optimize the edit for mobile viewing and strong retention.

123. 30-second reel — Variation 3

Create a 30-second Instagram Reel editing blueprint for [TOPIC] designed for retention and clarity. Keep the style realistic and avoid excessive transitions or effects.

124. Before-after reel — Variation 3

Create an engaging before-and-after edit for [TRANSFORMATION]. Include hook, reveal timing, sound design, captions, and CTA. Include precise timing guidance and a practical workflow for the editor.

125. Product reel — Variation 3

Create a premium product Reel edit for [PRODUCT] with macro shots, detail cuts, music rhythm, text overlays, and a strong final product reveal. Make the result suitable for a professional client deliverable.

126. Talking-head short — Variation 3

Edit a talking-head short about [TOPIC] with jump cuts, punch-ins, animated captions, B-roll, and pattern interrupts. Make the edit feel premium, natural, and commercially polished.

127. Trend adaptation — Variation 3

Adapt [TREND/FORMAT] into a professional short for [BRAND] without copying another creator's exact content. Optimize the edit for mobile viewing and strong retention.

128. Fast-paced edit — Variation 3

Create a fast-paced editing blueprint for [TOPIC] using cuts every [X] seconds, visual resets, zooms, B-roll, and sound effects. Keep the style realistic and avoid excessive transitions or effects.

129. Educational short — Variation 3

Edit an educational Reel about [TOPIC] so viewers understand the key idea quickly. Include hook, visual examples, captions, and recap. Include precise timing guidance and a practical workflow for the editor.

130. Story Reel — Variation 3

Turn this story [STORY] into a 30–45 second Reel with emotional pacing, visual beats, captions, music, and payoff. Make the result suitable for a professional client deliverable.

131. Viral short edit — Variation 4

Create a 30-second short-form editing plan for [TOPIC] with a 2-second hook, rapid visual changes, captions, B-roll, pattern interrupts, and CTA. Make the edit feel premium, natural, and commercially polished.

132. 15-second reel — Variation 4

Create a 15-second Reel edit using [FOOTAGE]. Specify exact timing, cuts, text overlays, music beats, and ending. Optimize the edit for mobile viewing and strong retention.

133. 30-second reel — Variation 4

Create a 30-second Instagram Reel editing blueprint for [TOPIC] designed for retention and clarity. Keep the style realistic and avoid excessive transitions or effects.

134. Before-after reel — Variation 4

Create an engaging before-and-after edit for [TRANSFORMATION]. Include hook, reveal timing, sound design, captions, and CTA. Include precise timing guidance and a practical workflow for the editor.

135. Product reel — Variation 4

Create a premium product Reel edit for [PRODUCT] with macro shots, detail cuts, music rhythm, text overlays, and a strong final product reveal. Make the result suitable for a professional client deliverable.

136. Talking-head short — Variation 4

Edit a talking-head short about [TOPIC] with jump cuts, punch-ins, animated captions, B-roll, and pattern interrupts. Make the edit feel premium, natural, and commercially polished.

137. Trend adaptation — Variation 4

Adapt [TREND/FORMAT] into a professional short for [BRAND] without copying another creator's exact content. Optimize the edit for mobile viewing and strong retention.

138. Fast-paced edit — Variation 4

Create a fast-paced editing blueprint for [TOPIC] using cuts every [X] seconds, visual resets, zooms, B-roll, and sound effects. Keep the style realistic and avoid excessive transitions or effects.

139. Educational short — Variation 4

Edit an educational Reel about [TOPIC] so viewers understand the key idea quickly. Include hook, visual examples, captions, and recap. Include precise timing guidance and a practical workflow for the editor.

140. Story Reel — Variation 4

Turn this story [STORY] into a 30–45 second Reel with emotional pacing, visual beats, captions, music, and payoff. Make the result suitable for a professional client deliverable.

141. Viral short edit — Variation 5

Create a 30-second short-form editing plan for [TOPIC] with a 2-second hook, rapid visual changes, captions, B-roll, pattern interrupts, and CTA. Make the edit feel premium, natural, and commercially polished.

142. 15-second reel — Variation 5

Create a 15-second Reel edit using [FOOTAGE]. Specify exact timing, cuts, text overlays, music beats, and ending. Optimize the edit for mobile viewing and strong retention.

143. 30-second reel — Variation 5

Create a 30-second Instagram Reel editing blueprint for [TOPIC] designed for retention and clarity. Keep the style realistic and avoid excessive transitions or effects.

144. Before-after reel — Variation 5

Create an engaging before-and-after edit for [TRANSFORMATION]. Include hook, reveal timing, sound design, captions, and CTA. Include precise timing guidance and a practical workflow for the editor.

145. Product reel — Variation 5

Create a premium product Reel edit for [PRODUCT] with macro shots, detail cuts, music rhythm, text overlays, and a strong final product reveal. Make the result suitable for a professional client deliverable.

146. Talking-head short — Variation 5

Edit a talking-head short about [TOPIC] with jump cuts, punch-ins, animated captions, B-roll, and pattern interrupts. Make the edit feel premium, natural, and commercially polished.

147. Trend adaptation — Variation 5

Adapt [TREND/FORMAT] into a professional short for [BRAND] without copying another creator's exact content. Optimize the edit for mobile viewing and strong retention.

148. Fast-paced edit — Variation 5

Create a fast-paced editing blueprint for [TOPIC] using cuts every [X] seconds, visual resets, zooms, B-roll, and sound effects. Keep the style realistic and avoid excessive transitions or effects.

149. Educational short — Variation 5

Edit an educational Reel about [TOPIC] so viewers understand the key idea quickly. Include hook, visual examples, captions, and recap. Include precise timing guidance and a practical workflow for the editor.

150. Story Reel — Variation 5

Turn this story [STORY] into a 30–45 second Reel with emotional pacing, visual beats, captions, music, and payoff. Make the result suitable for a professional client deliverable.

151. Viral short edit — Variation 6

Create a 30-second short-form editing plan for [TOPIC] with a 2-second hook, rapid visual changes, captions, B-roll, pattern interrupts, and CTA. Make the edit feel premium, natural, and commercially polished.

152. 15-second reel — Variation 6

Create a 15-second Reel edit using [FOOTAGE]. Specify exact timing, cuts, text overlays, music beats, and ending. Optimize the edit for mobile viewing and strong retention.

153. 30-second reel — Variation 6

Create a 30-second Instagram Reel editing blueprint for [TOPIC] designed for retention and clarity. Keep the style realistic and avoid excessive transitions or effects.

154. Before-after reel — Variation 6

Create an engaging before-and-after edit for [TRANSFORMATION]. Include hook, reveal timing, sound design, captions, and CTA. Include precise timing guidance and a practical workflow for the editor.

155. Product reel — Variation 6

Create a premium product Reel edit for [PRODUCT] with macro shots, detail cuts, music rhythm, text overlays, and a strong final product reveal. Make the result suitable for a professional client deliverable.

156. Talking-head short — Variation 6

Edit a talking-head short about [TOPIC] with jump cuts, punch-ins, animated captions, B-roll, and pattern interrupts. Make the edit feel premium, natural, and commercially polished.

157. Trend adaptation — Variation 6

Adapt [TREND/FORMAT] into a professional short for [BRAND] without copying another creator's exact content. Optimize the edit for mobile viewing and strong retention.

158. Fast-paced edit — Variation 6

Create a fast-paced editing blueprint for [TOPIC] using cuts every [X] seconds, visual resets, zooms, B-roll, and sound effects. Keep the style realistic and avoid excessive transitions or effects.

159. Educational short — Variation 6

Edit an educational Reel about [TOPIC] so viewers understand the key idea quickly. Include hook, visual examples, captions, and recap. Include precise timing guidance and a practical workflow for the editor.

160. Story Reel — Variation 6

Turn this story [STORY] into a 30–45 second Reel with emotional pacing, visual beats, captions, music, and payoff. Make the result suitable for a professional client deliverable.

161. Viral short edit — Variation 7

Create a 30-second short-form editing plan for [TOPIC] with a 2-second hook, rapid visual changes, captions, B-roll, pattern interrupts, and CTA. Make the edit feel premium, natural, and commercially polished.

162. 15-second reel — Variation 7

Create a 15-second Reel edit using [FOOTAGE]. Specify exact timing, cuts, text overlays, music beats, and ending. Optimize the edit for mobile viewing and strong retention.

163. 30-second reel — Variation 7

Create a 30-second Instagram Reel editing blueprint for [TOPIC] designed for retention and clarity. Keep the style realistic and avoid excessive transitions or effects.

164. Before-after reel — Variation 7

Create an engaging before-and-after edit for [TRANSFORMATION]. Include hook, reveal timing, sound design, captions, and CTA. Include precise timing guidance and a practical workflow for the editor.

165. Product reel — Variation 7

Create a premium product Reel edit for [PRODUCT] with macro shots, detail cuts, music rhythm, text overlays, and a strong final product reveal. Make the result suitable for a professional client deliverable.

166. Talking-head short — Variation 7

Edit a talking-head short about [TOPIC] with jump cuts, punch-ins, animated captions, B-roll, and pattern interrupts. Make the edit feel premium, natural, and commercially polished.

167. Trend adaptation — Variation 7

Adapt [TREND/FORMAT] into a professional short for [BRAND] without copying another creator's exact content. Optimize the edit for mobile viewing and strong retention.

168. Fast-paced edit — Variation 7

Create a fast-paced editing blueprint for [TOPIC] using cuts every [X] seconds, visual resets, zooms, B-roll, and sound effects. Keep the style realistic and avoid excessive transitions or effects.

169. Educational short — Variation 7

Edit an educational Reel about [TOPIC] so viewers understand the key idea quickly. Include hook, visual examples, captions, and recap. Include precise timing guidance and a practical workflow for the editor.

170. Story Reel — Variation 7

Turn this story [STORY] into a 30–45 second Reel with emotional pacing, visual beats, captions, music, and payoff. Make the result suitable for a professional client deliverable.

171. Viral short edit — Variation 8

Create a 30-second short-form editing plan for [TOPIC] with a 2-second hook, rapid visual changes, captions, B-roll, pattern interrupts, and CTA. Make the edit feel premium, natural, and commercially polished.

172. 15-second reel — Variation 8

Create a 15-second Reel edit using [FOOTAGE]. Specify exact timing, cuts, text overlays, music beats, and ending. Optimize the edit for mobile viewing and strong retention.

173. 30-second reel — Variation 8

Create a 30-second Instagram Reel editing blueprint for [TOPIC] designed for retention and clarity. Keep the style realistic and avoid excessive transitions or effects.

174. Before-after reel — Variation 8

Create an engaging before-and-after edit for [TRANSFORMATION]. Include hook, reveal timing, sound design, captions, and CTA. Include precise timing guidance and a practical workflow for the editor.

175. Product reel — Variation 8

Create a premium product Reel edit for [PRODUCT] with macro shots, detail cuts, music rhythm, text overlays, and a strong final product reveal. Make the result suitable for a professional client deliverable.

YouTube Editing

176. YouTube edit plan

Create a complete editing plan for a [LENGTH]-minute YouTube video about [TOPIC], including hook, pacing, B-roll, chapters, graphics, music, and retention moments.

177. YouTube intro

Create 5 editing concepts for the first 30 seconds of a YouTube video about [TOPIC] designed to maximize viewer retention.

178. Long-form pacing

Analyze this outline [OUTLINE] and recommend pacing, cuts, B-roll, graphics, pattern interrupts, and chapter breaks.

179. YouTube B-roll

Create a detailed B-roll map for this transcript [TRANSCRIPT], including exact sentences where visuals should change.

180. Tutorial edit

Create an editing workflow for a screen-recorded tutorial about [SOFTWARE/TOPIC], including zooms, cursor emphasis, callouts, captions, and chapters.

181. Vlog edit

Create a cinematic vlog editing structure for [DAY/TRIP/EVENT] that balances story, personality, B-roll, dialogue, music, and natural sound.

182. Podcast video edit

Create an editing plan for a video podcast using [FOOTAGE], including multicam cuts, punch-ins, captions, B-roll, graphics, and audio cleanup.

183. Review video

Create a professional editing structure for a review of [PRODUCT] with hook, product details, pros, cons, comparisons, verdict, and CTA.

184. Educational video

Create a retention-focused edit plan for an educational YouTube video about [TOPIC].

185. YouTube outro

Create 5 professional outro editing concepts for [CHANNEL] that encourage viewers to watch another video without feeling forced.

186. YouTube edit plan — Variation 2

Create a complete editing plan for a [LENGTH]-minute YouTube video about [TOPIC], including hook, pacing, B-roll, chapters, graphics, music, and retention moments. Make the edit feel premium, natural, and commercially polished.

187. YouTube intro — Variation 2

Create 5 editing concepts for the first 30 seconds of a YouTube video about [TOPIC] designed to maximize viewer retention. Optimize the edit for mobile viewing and strong retention.

188. Long-form pacing — Variation 2

Analyze this outline [OUTLINE] and recommend pacing, cuts, B-roll, graphics, pattern interrupts, and chapter breaks. Keep the style realistic and avoid excessive transitions or effects.

189. YouTube B-roll — Variation 2

Create a detailed B-roll map for this transcript [TRANSCRIPT], including exact sentences where visuals should change. Include precise timing guidance and a practical workflow for the editor.

190. Tutorial edit — Variation 2

Create an editing workflow for a screen-recorded tutorial about [SOFTWARE/TOPIC], including zooms, cursor emphasis, callouts, captions, and chapters. Make the result suitable for a professional client deliverable.

191. Vlog edit — Variation 2

Create a cinematic vlog editing structure for [DAY/TRIP/EVENT] that balances story, personality, B-roll, dialogue, music, and natural sound. Make the edit feel premium, natural, and commercially polished.

192. Podcast video edit — Variation 2

Create an editing plan for a video podcast using [FOOTAGE], including multicam cuts, punch-ins, captions, B-roll, graphics, and audio cleanup. Optimize the edit for mobile viewing and strong retention.

193. Review video — Variation 2

Create a professional editing structure for a review of [PRODUCT] with hook, product details, pros, cons, comparisons, verdict, and CTA. Keep the style realistic and avoid excessive transitions or effects.

194. Educational video — Variation 2

Create a retention-focused edit plan for an educational YouTube video about [TOPIC]. Include precise timing guidance and a practical workflow for the editor.

195. YouTube outro — Variation 2

Create 5 professional outro editing concepts for [CHANNEL] that encourage viewers to watch another video without feeling forced. Make the result suitable for a professional client deliverable.

196. YouTube edit plan — Variation 3

Create a complete editing plan for a [LENGTH]-minute YouTube video about [TOPIC], including hook, pacing, B-roll, chapters, graphics, music, and retention moments. Make the edit feel premium, natural, and commercially polished.

197. YouTube intro — Variation 3

Create 5 editing concepts for the first 30 seconds of a YouTube video about [TOPIC] designed to maximize viewer retention. Optimize the edit for mobile viewing and strong retention.

198. Long-form pacing — Variation 3

Analyze this outline [OUTLINE] and recommend pacing, cuts, B-roll, graphics, pattern interrupts, and chapter breaks. Keep the style realistic and avoid excessive transitions or effects.

199. YouTube B-roll — Variation 3

Create a detailed B-roll map for this transcript [TRANSCRIPT], including exact sentences where visuals should change. Include precise timing guidance and a practical workflow for the editor.

200. Tutorial edit — Variation 3

Create an editing workflow for a screen-recorded tutorial about [SOFTWARE/TOPIC], including zooms, cursor emphasis, callouts, captions, and chapters. Make the result suitable for a professional client deliverable.

201. Vlog edit — Variation 3

Create a cinematic vlog editing structure for [DAY/TRIP/EVENT] that balances story, personality, B-roll, dialogue, music, and natural sound. Make the edit feel premium, natural, and commercially polished.

202. Podcast video edit — Variation 3

Create an editing plan for a video podcast using [FOOTAGE], including multicam cuts, punch-ins, captions, B-roll, graphics, and audio cleanup. Optimize the edit for mobile viewing and strong retention.

203. Review video — Variation 3

Create a professional editing structure for a review of [PRODUCT] with hook, product details, pros, cons, comparisons, verdict, and CTA. Keep the style realistic and avoid excessive transitions or effects.

204. Educational video — Variation 3

Create a retention-focused edit plan for an educational YouTube video about [TOPIC]. Include precise timing guidance and a practical workflow for the editor.

205. YouTube outro — Variation 3

Create 5 professional outro editing concepts for [CHANNEL] that encourage viewers to watch another video without feeling forced. Make the result suitable for a professional client deliverable.

206. YouTube edit plan — Variation 4

Create a complete editing plan for a [LENGTH]-minute YouTube video about [TOPIC], including hook, pacing, B-roll, chapters, graphics, music, and retention moments. Make the edit feel premium, natural, and commercially polished.

207. YouTube intro — Variation 4

Create 5 editing concepts for the first 30 seconds of a YouTube video about [TOPIC] designed to maximize viewer retention. Optimize the edit for mobile viewing and strong retention.

208. Long-form pacing — Variation 4

Analyze this outline [OUTLINE] and recommend pacing, cuts, B-roll, graphics, pattern interrupts, and chapter breaks. Keep the style realistic and avoid excessive transitions or effects.

209. YouTube B-roll — Variation 4

Create a detailed B-roll map for this transcript [TRANSCRIPT], including exact sentences where visuals should change. Include precise timing guidance and a practical workflow for the editor.

210. Tutorial edit — Variation 4

Create an editing workflow for a screen-recorded tutorial about [SOFTWARE/TOPIC], including zooms, cursor emphasis, callouts, captions, and chapters. Make the result suitable for a professional client deliverable.

211. Vlog edit — Variation 4

Create a cinematic vlog editing structure for [DAY/TRIP/EVENT] that balances story, personality, B-roll, dialogue, music, and natural sound. Make the edit feel premium, natural, and commercially polished.

212. Podcast video edit — Variation 4

Create an editing plan for a video podcast using [FOOTAGE], including multicam cuts, punch-ins, captions, B-roll, graphics, and audio cleanup. Optimize the edit for mobile viewing and strong retention.

213. Review video — Variation 4

Create a professional editing structure for a review of [PRODUCT] with hook, product details, pros, cons, comparisons, verdict, and CTA. Keep the style realistic and avoid excessive transitions or effects.

214. Educational video — Variation 4

Create a retention-focused edit plan for an educational YouTube video about [TOPIC]. Include precise timing guidance and a practical workflow for the editor.

215. YouTube outro — Variation 4

Create 5 professional outro editing concepts for [CHANNEL] that encourage viewers to watch another video without feeling forced. Make the result suitable for a professional client deliverable.

216. YouTube edit plan — Variation 5

Create a complete editing plan for a [LENGTH]-minute YouTube video about [TOPIC], including hook, pacing, B-roll, chapters, graphics, music, and retention moments. Make the edit feel premium, natural, and commercially polished.

217. YouTube intro — Variation 5

Create 5 editing concepts for the first 30 seconds of a YouTube video about [TOPIC] designed to maximize viewer retention. Optimize the edit for mobile viewing and strong retention.

218. Long-form pacing — Variation 5

Analyze this outline [OUTLINE] and recommend pacing, cuts, B-roll, graphics, pattern interrupts, and chapter breaks. Keep the style realistic and avoid excessive transitions or effects.

219. YouTube B-roll — Variation 5

Create a detailed B-roll map for this transcript [TRANSCRIPT], including exact sentences where visuals should change. Include precise timing guidance and a practical workflow for the editor.

220. Tutorial edit — Variation 5

Create an editing workflow for a screen-recorded tutorial about [SOFTWARE/TOPIC], including zooms, cursor emphasis, callouts, captions, and chapters. Make the result suitable for a professional client deliverable.

221. Vlog edit — Variation 5

Create a cinematic vlog editing structure for [DAY/TRIP/EVENT] that balances story, personality, B-roll, dialogue, music, and natural sound. Make the edit feel premium, natural, and commercially polished.

222. Podcast video edit — Variation 5

Create an editing plan for a video podcast using [FOOTAGE], including multicam cuts, punch-ins, captions, B-roll, graphics, and audio cleanup. Optimize the edit for mobile viewing and strong retention.

223. Review video — Variation 5

Create a professional editing structure for a review of [PRODUCT] with hook, product details, pros, cons, comparisons, verdict, and CTA. Keep the style realistic and avoid excessive transitions or effects.

224. Educational video — Variation 5

Create a retention-focused edit plan for an educational YouTube video about [TOPIC]. Include precise timing guidance and a practical workflow for the editor.

225. YouTube outro — Variation 5

Create 5 professional outro editing concepts for [CHANNEL] that encourage viewers to watch another video without feeling forced. Make the result suitable for a professional client deliverable.

226. YouTube edit plan — Variation 6

Create a complete editing plan for a [LENGTH]-minute YouTube video about [TOPIC], including hook, pacing, B-roll, chapters, graphics, music, and retention moments. Make the edit feel premium, natural, and commercially polished.

227. YouTube intro — Variation 6

Create 5 editing concepts for the first 30 seconds of a YouTube video about [TOPIC] designed to maximize viewer retention. Optimize the edit for mobile viewing and strong retention.

228. Long-form pacing — Variation 6

Analyze this outline [OUTLINE] and recommend pacing, cuts, B-roll, graphics, pattern interrupts, and chapter breaks. Keep the style realistic and avoid excessive transitions or effects.

229. YouTube B-roll — Variation 6

Create a detailed B-roll map for this transcript [TRANSCRIPT], including exact sentences where visuals should change. Include precise timing guidance and a practical workflow for the editor.

230. Tutorial edit — Variation 6

Create an editing workflow for a screen-recorded tutorial about [SOFTWARE/TOPIC], including zooms, cursor emphasis, callouts, captions, and chapters. Make the result suitable for a professional client deliverable.

231. Vlog edit — Variation 6

Create a cinematic vlog editing structure for [DAY/TRIP/EVENT] that balances story, personality, B-roll, dialogue, music, and natural sound. Make the edit feel premium, natural, and commercially polished.

232. Podcast video edit — Variation 6

Create an editing plan for a video podcast using [FOOTAGE], including multicam cuts, punch-ins, captions, B-roll, graphics, and audio cleanup. Optimize the edit for mobile viewing and strong retention.

233. Review video — Variation 6

Create a professional editing structure for a review of [PRODUCT] with hook, product details, pros, cons, comparisons, verdict, and CTA. Keep the style realistic and avoid excessive transitions or effects.

234. Educational video — Variation 6

Create a retention-focused edit plan for an educational YouTube video about [TOPIC]. Include precise timing guidance and a practical workflow for the editor.

235. YouTube outro — Variation 6

Create 5 professional outro editing concepts for [CHANNEL] that encourage viewers to watch another video without feeling forced. Make the result suitable for a professional client deliverable.

AI Video Editing

236. AI edit workflow

Design an AI-assisted editing workflow for [PROJECT] covering transcription, scene detection, selects, captions, B-roll, audio cleanup, color, and export.

237. AI B-roll prompts

Generate 10 AI video B-roll prompts that visually illustrate [TOPIC], each with camera movement, subject action, lighting, and duration.

238. AI transition prompt

Write an AI video-generation prompt for a seamless transition between [SCENE A] and [SCENE B].

239. AI background replacement

Create an AI editing prompt to replace the background of [SUBJECT] with [NEW BACKGROUND] while preserving realistic edges, lighting, shadows, and perspective.

240. AI object removal

Create a precise AI video-editing instruction for removing [OBJECT] from footage while preserving natural texture, reflections, shadows, and motion.

241. AI video extension

Create an AI prompt to extend the beginning/end of [SHOT] naturally while matching camera movement, lighting, lens, grain, and subject continuity.

242. AI slow motion

Create an AI prompt to generate realistic slow motion from [FOOTAGE] while preserving natural motion, facial details, physics, and image quality.

243. AI upscale

Create an AI enhancement workflow for [FOOTAGE] to improve detail and clarity without inventing distracting textures or changing faces.

244. AI relighting

Create an AI video-editing prompt to relight [SCENE] with [LIGHTING STYLE] while preserving realistic shadows, skin tones, reflections, and exposure.

245. AI scene consistency

Create a prompt for maintaining character, wardrobe, environment, camera direction, and lighting consistency across multiple AI-generated shots.

246. AI edit workflow — Variation 2

Design an AI-assisted editing workflow for [PROJECT] covering transcription, scene detection, selects, captions, B-roll, audio cleanup, color, and export. Make the edit feel premium, natural, and commercially polished.

247. AI B-roll prompts — Variation 2

Generate 10 AI video B-roll prompts that visually illustrate [TOPIC], each with camera movement, subject action, lighting, and duration. Optimize the edit for mobile viewing and strong retention.

248. AI transition prompt — Variation 2

Write an AI video-generation prompt for a seamless transition between [SCENE A] and [SCENE B]. Keep the style realistic and avoid excessive transitions or effects.

249. AI background replacement — Variation 2

Create an AI editing prompt to replace the background of [SUBJECT] with [NEW BACKGROUND] while preserving realistic edges, lighting, shadows, and perspective. Include precise timing guidance and a practical workflow for the editor.

250. AI object removal — Variation 2

Create a precise AI video-editing instruction for removing [OBJECT] from footage while preserving natural texture, reflections, shadows, and motion. Make the result suitable for a professional client deliverable.

251. AI video extension — Variation 2

Create an AI prompt to extend the beginning/end of [SHOT] naturally while matching camera movement, lighting, lens, grain, and subject continuity. Make the edit feel premium, natural, and commercially polished.

252. AI slow motion — Variation 2

Create an AI prompt to generate realistic slow motion from [FOOTAGE] while preserving natural motion, facial details, physics, and image quality. Optimize the edit for mobile viewing and strong retention.

253. AI upscale — Variation 2

Create an AI enhancement workflow for [FOOTAGE] to improve detail and clarity without inventing distracting textures or changing faces. Keep the style realistic and avoid excessive transitions or effects.

254. AI relighting — Variation 2

Create an AI video-editing prompt to relight [SCENE] with [LIGHTING STYLE] while preserving realistic shadows, skin tones, reflections, and exposure. Include precise timing guidance and a practical workflow for the editor.

255. AI scene consistency — Variation 2

Create a prompt for maintaining character, wardrobe, environment, camera direction, and lighting consistency across multiple AI-generated shots. Make the result suitable for a professional client deliverable.

256. AI edit workflow — Variation 3

Design an AI-assisted editing workflow for [PROJECT] covering transcription, scene detection, selects, captions, B-roll, audio cleanup, color, and export. Make the edit feel premium, natural, and commercially polished.

257. AI B-roll prompts — Variation 3

Generate 10 AI video B-roll prompts that visually illustrate [TOPIC], each with camera movement, subject action, lighting, and duration. Optimize the edit for mobile viewing and strong retention.

258. AI transition prompt — Variation 3

Write an AI video-generation prompt for a seamless transition between [SCENE A] and [SCENE B]. Keep the style realistic and avoid excessive transitions or effects.

259. AI background replacement — Variation 3

Create an AI editing prompt to replace the background of [SUBJECT] with [NEW BACKGROUND] while preserving realistic edges, lighting, shadows, and perspective. Include precise timing guidance and a practical workflow for the editor.

260. AI object removal — Variation 3

Create a precise AI video-editing instruction for removing [OBJECT] from footage while preserving natural texture, reflections, shadows, and motion. Make the result suitable for a professional client deliverable.

261. AI video extension — Variation 3

Create an AI prompt to extend the beginning/end of [SHOT] naturally while matching camera movement, lighting, lens, grain, and subject continuity. Make the edit feel premium, natural, and commercially polished.

262. AI slow motion — Variation 3

Create an AI prompt to generate realistic slow motion from [FOOTAGE] while preserving natural motion, facial details, physics, and image quality. Optimize the edit for mobile viewing and strong retention.

263. AI upscale — Variation 3

Create an AI enhancement workflow for [FOOTAGE] to improve detail and clarity without inventing distracting textures or changing faces. Keep the style realistic and avoid excessive transitions or effects.

264. AI relighting — Variation 3

Create an AI video-editing prompt to relight [SCENE] with [LIGHTING STYLE] while preserving realistic shadows, skin tones, reflections, and exposure. Include precise timing guidance and a practical workflow for the editor.

265. AI scene consistency — Variation 3

Create a prompt for maintaining character, wardrobe, environment, camera direction, and lighting consistency across multiple AI-generated shots. Make the result suitable for a professional client deliverable.

266. AI edit workflow — Variation 4

Design an AI-assisted editing workflow for [PROJECT] covering transcription, scene detection, selects, captions, B-roll, audio cleanup, color, and export. Make the edit feel premium, natural, and commercially polished.

267. AI B-roll prompts — Variation 4

Generate 10 AI video B-roll prompts that visually illustrate [TOPIC], each with camera movement, subject action, lighting, and duration. Optimize the edit for mobile viewing and strong retention.

268. AI transition prompt — Variation 4

Write an AI video-generation prompt for a seamless transition between [SCENE A] and [SCENE B]. Keep the style realistic and avoid excessive transitions or effects.

269. AI background replacement — Variation 4

Create an AI editing prompt to replace the background of [SUBJECT] with [NEW BACKGROUND] while preserving realistic edges, lighting, shadows, and perspective. Include precise timing guidance and a practical workflow for the editor.

270. AI object removal — Variation 4

Create a precise AI video-editing instruction for removing [OBJECT] from footage while preserving natural texture, reflections, shadows, and motion. Make the result suitable for a professional client deliverable.

271. AI video extension — Variation 4

Create an AI prompt to extend the beginning/end of [SHOT] naturally while matching camera movement, lighting, lens, grain, and subject continuity. Make the edit feel premium, natural, and commercially polished.

272. AI slow motion — Variation 4

Create an AI prompt to generate realistic slow motion from [FOOTAGE] while preserving natural motion, facial details, physics, and image quality. Optimize the edit for mobile viewing and strong retention.

273. AI upscale — Variation 4

Create an AI enhancement workflow for [FOOTAGE] to improve detail and clarity without inventing distracting textures or changing faces. Keep the style realistic and avoid excessive transitions or effects.

274. AI relighting — Variation 4

Create an AI video-editing prompt to relight [SCENE] with [LIGHTING STYLE] while preserving realistic shadows, skin tones, reflections, and exposure. Include precise timing guidance and a practical workflow for the editor.

275. AI scene consistency — Variation 4

Create a prompt for maintaining character, wardrobe, environment, camera direction, and lighting consistency across multiple AI-generated shots. Make the result suitable for a professional client deliverable.

276. AI edit workflow — Variation 5

Design an AI-assisted editing workflow for [PROJECT] covering transcription, scene detection, selects, captions, B-roll, audio cleanup, color, and export. Make the edit feel premium, natural, and commercially polished.

277. AI B-roll prompts — Variation 5

Generate 10 AI video B-roll prompts that visually illustrate [TOPIC], each with camera movement, subject action, lighting, and duration. Optimize the edit for mobile viewing and strong retention.

278. AI transition prompt — Variation 5

Write an AI video-generation prompt for a seamless transition between [SCENE A] and [SCENE B]. Keep the style realistic and avoid excessive transitions or effects.

279. AI background replacement — Variation 5

Create an AI editing prompt to replace the background of [SUBJECT] with [NEW BACKGROUND] while preserving realistic edges, lighting, shadows, and perspective. Include precise timing guidance and a practical workflow for the editor.

280. AI object removal — Variation 5

Create a precise AI video-editing instruction for removing [OBJECT] from footage while preserving natural texture, reflections, shadows, and motion. Make the result suitable for a professional client deliverable.

281. AI video extension — Variation 5

Create an AI prompt to extend the beginning/end of [SHOT] naturally while matching camera movement, lighting, lens, grain, and subject continuity. Make the edit feel premium, natural, and commercially polished.

282. AI slow motion — Variation 5

Create an AI prompt to generate realistic slow motion from [FOOTAGE] while preserving natural motion, facial details, physics, and image quality. Optimize the edit for mobile viewing and strong retention.

283. AI upscale — Variation 5

Create an AI enhancement workflow for [FOOTAGE] to improve detail and clarity without inventing distracting textures or changing faces. Keep the style realistic and avoid excessive transitions or effects.

284. AI relighting — Variation 5

Create an AI video-editing prompt to relight [SCENE] with [LIGHTING STYLE] while preserving realistic shadows, skin tones, reflections, and exposure. Include precise timing guidance and a practical workflow for the editor.

285. AI scene consistency — Variation 5

Create a prompt for maintaining character, wardrobe, environment, camera direction, and lighting consistency across multiple AI-generated shots. Make the result suitable for a professional client deliverable.

286. AI edit workflow — Variation 6

Design an AI-assisted editing workflow for [PROJECT] covering transcription, scene detection, selects, captions, B-roll, audio cleanup, color, and export. Make the edit feel premium, natural, and commercially polished.

287. AI B-roll prompts — Variation 6

Generate 10 AI video B-roll prompts that visually illustrate [TOPIC], each with camera movement, subject action, lighting, and duration. Optimize the edit for mobile viewing and strong retention.

288. AI transition prompt — Variation 6

Write an AI video-generation prompt for a seamless transition between [SCENE A] and [SCENE B]. Keep the style realistic and avoid excessive transitions or effects.

289. AI background replacement — Variation 6

Create an AI editing prompt to replace the background of [SUBJECT] with [NEW BACKGROUND] while preserving realistic edges, lighting, shadows, and perspective. Include precise timing guidance and a practical workflow for the editor.

290. AI object removal — Variation 6

Create a precise AI video-editing instruction for removing [OBJECT] from footage while preserving natural texture, reflections, shadows, and motion. Make the result suitable for a professional client deliverable.

291. AI video extension — Variation 6

Create an AI prompt to extend the beginning/end of [SHOT] naturally while matching camera movement, lighting, lens, grain, and subject continuity. Make the edit feel premium, natural, and commercially polished.

292. AI slow motion — Variation 6

Create an AI prompt to generate realistic slow motion from [FOOTAGE] while preserving natural motion, facial details, physics, and image quality. Optimize the edit for mobile viewing and strong retention.

293. AI upscale — Variation 6

Create an AI enhancement workflow for [FOOTAGE] to improve detail and clarity without inventing distracting textures or changing faces. Keep the style realistic and avoid excessive transitions or effects.

294. AI relighting — Variation 6

Create an AI video-editing prompt to relight [SCENE] with [LIGHTING STYLE] while preserving realistic shadows, skin tones, reflections, and exposure. Include precise timing guidance and a practical workflow for the editor.

295. AI scene consistency — Variation 6

Create a prompt for maintaining character, wardrobe, environment, camera direction, and lighting consistency across multiple AI-generated shots. Make the result suitable for a professional client deliverable.

Color Grading & Looks

296. Cinematic grade

Create a professional cinematic color-grading recipe for [FOOTAGE] with exposure, white balance, contrast, saturation, skin tones, highlights, shadows, and look direction.

297. Natural commercial grade

Create a clean natural commercial grade for [FOOTAGE] that preserves realistic skin tones and product colors.

298. Luxury look

Create a luxury editorial color grade for [FOOTAGE] with controlled contrast, refined highlights, rich but believable color, and premium skin tones.

299. Warm lifestyle grade

Create a warm lifestyle grade for [FOOTAGE] with natural skin tones and subtle golden highlights.

300. Moody grade

Create a moody cinematic grade for [FOOTAGE] with controlled blacks, restrained saturation, atmospheric highlights, and preserved detail.

301. Day-to-night look

Design a believable day-to-night color transformation for [FOOTAGE] while keeping skin and practical lights realistic.

302. Match cameras

Create a camera-matching workflow for footage from [CAMERA A] and [CAMERA B] so exposure, white balance, contrast, and skin tones match.

303. Fix mixed lighting

Create a color-correction workflow for footage with daylight and artificial lighting mixed in the same scene.

304. Skin tone correction

Create a skin-tone correction checklist for [FOOTAGE] while preserving the intended creative look.

305. Real-estate grade

Create a premium architectural/real-estate color grade for [FOOTAGE] with neutral whites, natural greens, realistic materials, and polished contrast.

306. Cinematic grade — Variation 2

Create a professional cinematic color-grading recipe for [FOOTAGE] with exposure, white balance, contrast, saturation, skin tones, highlights, shadows, and look direction. Make the edit feel premium, natural, and commercially polished.

307. Natural commercial grade — Variation 2

Create a clean natural commercial grade for [FOOTAGE] that preserves realistic skin tones and product colors. Optimize the edit for mobile viewing and strong retention.

308. Luxury look — Variation 2

Create a luxury editorial color grade for [FOOTAGE] with controlled contrast, refined highlights, rich but believable color, and premium skin tones. Keep the style realistic and avoid excessive transitions or effects.

309. Warm lifestyle grade — Variation 2

Create a warm lifestyle grade for [FOOTAGE] with natural skin tones and subtle golden highlights. Include precise timing guidance and a practical workflow for the editor.

310. Moody grade — Variation 2

Create a moody cinematic grade for [FOOTAGE] with controlled blacks, restrained saturation, atmospheric highlights, and preserved detail. Make the result suitable for a professional client deliverable.

311. Day-to-night look — Variation 2

Design a believable day-to-night color transformation for [FOOTAGE] while keeping skin and practical lights realistic. Make the edit feel premium, natural, and commercially polished.

312. Match cameras — Variation 2

Create a camera-matching workflow for footage from [CAMERA A] and [CAMERA B] so exposure, white balance, contrast, and skin tones match. Optimize the edit for mobile viewing and strong retention.

313. Fix mixed lighting — Variation 2

Create a color-correction workflow for footage with daylight and artificial lighting mixed in the same scene. Keep the style realistic and avoid excessive transitions or effects.

314. Skin tone correction — Variation 2

Create a skin-tone correction checklist for [FOOTAGE] while preserving the intended creative look. Include precise timing guidance and a practical workflow for the editor.

315. Real-estate grade — Variation 2

Create a premium architectural/real-estate color grade for [FOOTAGE] with neutral whites, natural greens, realistic materials, and polished contrast. Make the result suitable for a professional client deliverable.

316. Cinematic grade — Variation 3

Create a professional cinematic color-grading recipe for [FOOTAGE] with exposure, white balance, contrast, saturation, skin tones, highlights, shadows, and look direction. Make the edit feel premium, natural, and commercially polished.

317. Natural commercial grade — Variation 3

Create a clean natural commercial grade for [FOOTAGE] that preserves realistic skin tones and product colors. Optimize the edit for mobile viewing and strong retention.

318. Luxury look — Variation 3

Create a luxury editorial color grade for [FOOTAGE] with controlled contrast, refined highlights, rich but believable color, and premium skin tones. Keep the style realistic and avoid excessive transitions or effects.

319. Warm lifestyle grade — Variation 3

Create a warm lifestyle grade for [FOOTAGE] with natural skin tones and subtle golden highlights. Include precise timing guidance and a practical workflow for the editor.

320. Moody grade — Variation 3

Create a moody cinematic grade for [FOOTAGE] with controlled blacks, restrained saturation, atmospheric highlights, and preserved detail. Make the result suitable for a professional client deliverable.

321. Day-to-night look — Variation 3

Design a believable day-to-night color transformation for [FOOTAGE] while keeping skin and practical lights realistic. Make the edit feel premium, natural, and commercially polished.

322. Match cameras — Variation 3

Create a camera-matching workflow for footage from [CAMERA A] and [CAMERA B] so exposure, white balance, contrast, and skin tones match. Optimize the edit for mobile viewing and strong retention.

323. Fix mixed lighting — Variation 3

Create a color-correction workflow for footage with daylight and artificial lighting mixed in the same scene. Keep the style realistic and avoid excessive transitions or effects.

324. Skin tone correction — Variation 3

Create a skin-tone correction checklist for [FOOTAGE] while preserving the intended creative look. Include precise timing guidance and a practical workflow for the editor.

325. Real-estate grade — Variation 3

Create a premium architectural/real-estate color grade for [FOOTAGE] with neutral whites, natural greens, realistic materials, and polished contrast. Make the result suitable for a professional client deliverable.

326. Cinematic grade — Variation 4

Create a professional cinematic color-grading recipe for [FOOTAGE] with exposure, white balance, contrast, saturation, skin tones, highlights, shadows, and look direction. Make the edit feel premium, natural, and commercially polished.

327. Natural commercial grade — Variation 4

Create a clean natural commercial grade for [FOOTAGE] that preserves realistic skin tones and product colors. Optimize the edit for mobile viewing and strong retention.

328. Luxury look — Variation 4

Create a luxury editorial color grade for [FOOTAGE] with controlled contrast, refined highlights, rich but believable color, and premium skin tones. Keep the style realistic and avoid excessive transitions or effects.

329. Warm lifestyle grade — Variation 4

Create a warm lifestyle grade for [FOOTAGE] with natural skin tones and subtle golden highlights. Include precise timing guidance and a practical workflow for the editor.

330. Moody grade — Variation 4

Create a moody cinematic grade for [FOOTAGE] with controlled blacks, restrained saturation, atmospheric highlights, and preserved detail. Make the result suitable for a professional client deliverable.

331. Day-to-night look — Variation 4

Design a believable day-to-night color transformation for [FOOTAGE] while keeping skin and practical lights realistic. Make the edit feel premium, natural, and commercially polished.

332. Match cameras — Variation 4

Create a camera-matching workflow for footage from [CAMERA A] and [CAMERA B] so exposure, white balance, contrast, and skin tones match. Optimize the edit for mobile viewing and strong retention.

333. Fix mixed lighting — Variation 4

Create a color-correction workflow for footage with daylight and artificial lighting mixed in the same scene. Keep the style realistic and avoid excessive transitions or effects.

334. Skin tone correction — Variation 4

Create a skin-tone correction checklist for [FOOTAGE] while preserving the intended creative look. Include precise timing guidance and a practical workflow for the editor.

335. Real-estate grade — Variation 4

Create a premium architectural/real-estate color grade for [FOOTAGE] with neutral whites, natural greens, realistic materials, and polished contrast. Make the result suitable for a professional client deliverable.

Audio, SFX & Voiceover

336. Audio cleanup

Create an audio-cleanup workflow for [FOOTAGE] covering noise reduction, EQ, compression, de-essing, leveling, and loudness.

337. Dialogue mix

Create a professional dialogue-mixing recipe for [VIDEO] with voice clarity, music ducking, SFX balance, and final loudness.

338. Sound design

Create a detailed sound-design plan for [VIDEO] with ambience, impacts, whooshes, risers, transitions, and natural sounds.

339. Music selection

Recommend the ideal music style, BPM range, instrumentation, energy curve, and edit points for [VIDEO].

340. Music edit points

Create music beat-editing points for [TRACK DESCRIPTION] and explain where cuts, reveals, and transitions should land.

341. Voiceover pacing

Edit this voiceover [SCRIPT] into natural timing with pauses, emphasis, breaths, and visual cue points.

342. Voiceover script

Write a concise voiceover for a [DURATION]-second video about [TOPIC] with a strong opening and clear ending.

343. Audio transitions

Create a sound-transition plan between [SCENE A] and [SCENE B] using ambience, risers, impacts, and music changes.

344. Cinematic soundscape

Design a cinematic soundscape for [SCENE] with foreground, midground, and background audio layers.

345. Ad audio mix

Create a broadcast-ready audio mix plan for a [DURATION]-second advertisement with dialogue, music, SFX, and final loudness guidance.

346. Audio cleanup — Variation 2

Create an audio-cleanup workflow for [FOOTAGE] covering noise reduction, EQ, compression, de-essing, leveling, and loudness. Make the edit feel premium, natural, and commercially polished.

347. Dialogue mix — Variation 2

Create a professional dialogue-mixing recipe for [VIDEO] with voice clarity, music ducking, SFX balance, and final loudness. Optimize the edit for mobile viewing and strong retention.

348. Sound design — Variation 2

Create a detailed sound-design plan for [VIDEO] with ambience, impacts, whooshes, risers, transitions, and natural sounds. Keep the style realistic and avoid excessive transitions or effects.

349. Music selection — Variation 2

Recommend the ideal music style, BPM range, instrumentation, energy curve, and edit points for [VIDEO]. Include precise timing guidance and a practical workflow for the editor.

350. Music edit points — Variation 2

Create music beat-editing points for [TRACK DESCRIPTION] and explain where cuts, reveals, and transitions should land. Make the result suitable for a professional client deliverable.

351. Voiceover pacing — Variation 2

Edit this voiceover [SCRIPT] into natural timing with pauses, emphasis, breaths, and visual cue points. Make the edit feel premium, natural, and commercially polished.

352. Voiceover script — Variation 2

Write a concise voiceover for a [DURATION]-second video about [TOPIC] with a strong opening and clear ending. Optimize the edit for mobile viewing and strong retention.

353. Audio transitions — Variation 2

Create a sound-transition plan between [SCENE A] and [SCENE B] using ambience, risers, impacts, and music changes. Keep the style realistic and avoid excessive transitions or effects.

354. Cinematic soundscape — Variation 2

Design a cinematic soundscape for [SCENE] with foreground, midground, and background audio layers. Include precise timing guidance and a practical workflow for the editor.

355. Ad audio mix — Variation 2

Create a broadcast-ready audio mix plan for a [DURATION]-second advertisement with dialogue, music, SFX, and final loudness guidance. Make the result suitable for a professional client deliverable.

356. Audio cleanup — Variation 3

Create an audio-cleanup workflow for [FOOTAGE] covering noise reduction, EQ, compression, de-essing, leveling, and loudness. Make the edit feel premium, natural, and commercially polished.

357. Dialogue mix — Variation 3

Create a professional dialogue-mixing recipe for [VIDEO] with voice clarity, music ducking, SFX balance, and final loudness. Optimize the edit for mobile viewing and strong retention.

358. Sound design — Variation 3

Create a detailed sound-design plan for [VIDEO] with ambience, impacts, whooshes, risers, transitions, and natural sounds. Keep the style realistic and avoid excessive transitions or effects.

359. Music selection — Variation 3

Recommend the ideal music style, BPM range, instrumentation, energy curve, and edit points for [VIDEO]. Include precise timing guidance and a practical workflow for the editor.

360. Music edit points — Variation 3

Create music beat-editing points for [TRACK DESCRIPTION] and explain where cuts, reveals, and transitions should land. Make the result suitable for a professional client deliverable.

361. Voiceover pacing — Variation 3

Edit this voiceover [SCRIPT] into natural timing with pauses, emphasis, breaths, and visual cue points. Make the edit feel premium, natural, and commercially polished.

362. Voiceover script — Variation 3

Write a concise voiceover for a [DURATION]-second video about [TOPIC] with a strong opening and clear ending. Optimize the edit for mobile viewing and strong retention.

363. Audio transitions — Variation 3

Create a sound-transition plan between [SCENE A] and [SCENE B] using ambience, risers, impacts, and music changes. Keep the style realistic and avoid excessive transitions or effects.

364. Cinematic soundscape — Variation 3

Design a cinematic soundscape for [SCENE] with foreground, midground, and background audio layers. Include precise timing guidance and a practical workflow for the editor.

365. Ad audio mix — Variation 3

Create a broadcast-ready audio mix plan for a [DURATION]-second advertisement with dialogue, music, SFX, and final loudness guidance. Make the result suitable for a professional client deliverable.

366. Audio cleanup — Variation 4

Create an audio-cleanup workflow for [FOOTAGE] covering noise reduction, EQ, compression, de-essing, leveling, and loudness. Make the edit feel premium, natural, and commercially polished.

367. Dialogue mix — Variation 4

Create a professional dialogue-mixing recipe for [VIDEO] with voice clarity, music ducking, SFX balance, and final loudness. Optimize the edit for mobile viewing and strong retention.

368. Sound design — Variation 4

Create a detailed sound-design plan for [VIDEO] with ambience, impacts, whooshes, risers, transitions, and natural sounds. Keep the style realistic and avoid excessive transitions or effects.

369. Music selection — Variation 4

Recommend the ideal music style, BPM range, instrumentation, energy curve, and edit points for [VIDEO]. Include precise timing guidance and a practical workflow for the editor.

370. Music edit points — Variation 4

Create music beat-editing points for [TRACK DESCRIPTION] and explain where cuts, reveals, and transitions should land. Make the result suitable for a professional client deliverable.

Captions & Text Animation

371. Dynamic captions

Create a dynamic caption style for [VIDEO] including font style, hierarchy, timing, emphasis words, animation, and safe margins.

372. Kinetic typography

Create a kinetic typography plan for [SCRIPT] with line-by-line animation, emphasis, movement, and timing.

373. Subtitle cleanup

Clean and format these subtitles [TEXT] for readability, natural line breaks, punctuation, and timing.

374. Caption hooks

Create 20 short on-screen text hooks for a video about [TOPIC].

375. Lower thirds

Design 5 professional lower-third concepts for [BRAND/VIDEO] with timing and animation direction.

376. Title animation

Create a modern title animation concept for [VIDEO TITLE] with duration, movement, typography, and sound cue.

377. Callout graphics

Create an on-screen callout strategy for [VIDEO] showing where arrows, labels, highlights, or diagrams should appear.

378. Text-safe layout

Create a text-placement guide for [PLATFORM] ensuring captions and graphics avoid interface elements.

379. Brand graphics

Create a motion-graphics style guide for [BRAND] covering fonts, colors, shapes, transitions, lower thirds, and captions.

380. Caption retention

Rewrite and structure captions for [TOPIC] so important words are emphasized without overcrowding the screen.

381. Dynamic captions — Variation 2

Create a dynamic caption style for [VIDEO] including font style, hierarchy, timing, emphasis words, animation, and safe margins. Make the edit feel premium, natural, and commercially polished.

382. Kinetic typography — Variation 2

Create a kinetic typography plan for [SCRIPT] with line-by-line animation, emphasis, movement, and timing. Optimize the edit for mobile viewing and strong retention.

383. Subtitle cleanup — Variation 2

Clean and format these subtitles [TEXT] for readability, natural line breaks, punctuation, and timing. Keep the style realistic and avoid excessive transitions or effects.

384. Caption hooks — Variation 2

Create 20 short on-screen text hooks for a video about [TOPIC]. Include precise timing guidance and a practical workflow for the editor.

385. Lower thirds — Variation 2

Design 5 professional lower-third concepts for [BRAND/VIDEO] with timing and animation direction. Make the result suitable for a professional client deliverable.

386. Title animation — Variation 2

Create a modern title animation concept for [VIDEO TITLE] with duration, movement, typography, and sound cue. Make the edit feel premium, natural, and commercially polished.

387. Callout graphics — Variation 2

Create an on-screen callout strategy for [VIDEO] showing where arrows, labels, highlights, or diagrams should appear. Optimize the edit for mobile viewing and strong retention.

388. Text-safe layout — Variation 2

Create a text-placement guide for [PLATFORM] ensuring captions and graphics avoid interface elements. Keep the style realistic and avoid excessive transitions or effects.

389. Brand graphics — Variation 2

Create a motion-graphics style guide for [BRAND] covering fonts, colors, shapes, transitions, lower thirds, and captions. Include precise timing guidance and a practical workflow for the editor.

390. Caption retention — Variation 2

Rewrite and structure captions for [TOPIC] so important words are emphasized without overcrowding the screen. Make the result suitable for a professional client deliverable.

391. Dynamic captions — Variation 3

Create a dynamic caption style for [VIDEO] including font style, hierarchy, timing, emphasis words, animation, and safe margins. Make the edit feel premium, natural, and commercially polished.

392. Kinetic typography — Variation 3

Create a kinetic typography plan for [SCRIPT] with line-by-line animation, emphasis, movement, and timing. Optimize the edit for mobile viewing and strong retention.

393. Subtitle cleanup — Variation 3

Clean and format these subtitles [TEXT] for readability, natural line breaks, punctuation, and timing. Keep the style realistic and avoid excessive transitions or effects.

394. Caption hooks — Variation 3

Create 20 short on-screen text hooks for a video about [TOPIC]. Include precise timing guidance and a practical workflow for the editor.

395. Lower thirds — Variation 3

Design 5 professional lower-third concepts for [BRAND/VIDEO] with timing and animation direction. Make the result suitable for a professional client deliverable.

396. Title animation — Variation 3

Create a modern title animation concept for [VIDEO TITLE] with duration, movement, typography, and sound cue. Make the edit feel premium, natural, and commercially polished.

397. Callout graphics — Variation 3

Create an on-screen callout strategy for [VIDEO] showing where arrows, labels, highlights, or diagrams should appear. Optimize the edit for mobile viewing and strong retention.

398. Text-safe layout — Variation 3

Create a text-placement guide for [PLATFORM] ensuring captions and graphics avoid interface elements. Keep the style realistic and avoid excessive transitions or effects.

399. Brand graphics — Variation 3

Create a motion-graphics style guide for [BRAND] covering fonts, colors, shapes, transitions, lower thirds, and captions. Include precise timing guidance and a practical workflow for the editor.

400. Caption retention — Variation 3

Rewrite and structure captions for [TOPIC] so important words are emphasized without overcrowding the screen. Make the result suitable for a professional client deliverable.

401. Dynamic captions — Variation 4

Create a dynamic caption style for [VIDEO] including font style, hierarchy, timing, emphasis words, animation, and safe margins. Make the edit feel premium, natural, and commercially polished.

402. Kinetic typography — Variation 4

Create a kinetic typography plan for [SCRIPT] with line-by-line animation, emphasis, movement, and timing. Optimize the edit for mobile viewing and strong retention.

403. Subtitle cleanup — Variation 4

Clean and format these subtitles [TEXT] for readability, natural line breaks, punctuation, and timing. Keep the style realistic and avoid excessive transitions or effects.

404. Caption hooks — Variation 4

Create 20 short on-screen text hooks for a video about [TOPIC]. Include precise timing guidance and a practical workflow for the editor.

405. Lower thirds — Variation 4

Design 5 professional lower-third concepts for [BRAND/VIDEO] with timing and animation direction. Make the result suitable for a professional client deliverable.

Hooks, Retention & Pacing

406. 3-second hook

Create 20 visual and editorial hooks for the first 3 seconds of a video about [TOPIC].

407. Pattern interrupts

Create 15 pattern-interrupt ideas for [VIDEO] that can be inserted naturally without distracting from the story.

408. Retention map

Create a retention map for [VIDEO] showing where to place reveals, questions, B-roll, graphics, emotional changes, and resets.

409. Cut rhythm

Design a cut rhythm for [VIDEO STYLE] using different shot durations for hook, explanation, climax, and CTA.

410. Open loop edit

Create an editing strategy that introduces an open loop in the first 10 seconds and resolves it near the end.

411. Dead-air removal

Create rules for removing pauses, filler words, repeated phrases, and dead air while keeping the speaker natural.

412. Emotional pacing

Map the emotional intensity of [STORY] and suggest editing changes for each emotional beat.

413. Attention reset

Create 10 subtle visual attention resets for a talking-head video that do not feel over-edited.

414. Retention audit

Analyze this transcript/outline [INPUT] and identify 10 points where viewers may lose interest, then propose edits.

415. Ending payoff

Create 5 editing strategies that make the final payoff of [VIDEO] feel satisfying and memorable.

416. 3-second hook — Variation 2

Create 20 visual and editorial hooks for the first 3 seconds of a video about [TOPIC]. Make the edit feel premium, natural, and commercially polished.

417. Pattern interrupts — Variation 2

Create 15 pattern-interrupt ideas for [VIDEO] that can be inserted naturally without distracting from the story. Optimize the edit for mobile viewing and strong retention.

418. Retention map — Variation 2

Create a retention map for [VIDEO] showing where to place reveals, questions, B-roll, graphics, emotional changes, and resets. Keep the style realistic and avoid excessive transitions or effects.

419. Cut rhythm — Variation 2

Design a cut rhythm for [VIDEO STYLE] using different shot durations for hook, explanation, climax, and CTA. Include precise timing guidance and a practical workflow for the editor.

420. Open loop edit — Variation 2

Create an editing strategy that introduces an open loop in the first 10 seconds and resolves it near the end. Make the result suitable for a professional client deliverable.

421. Dead-air removal — Variation 2

Create rules for removing pauses, filler words, repeated phrases, and dead air while keeping the speaker natural. Make the edit feel premium, natural, and commercially polished.

422. Emotional pacing — Variation 2

Map the emotional intensity of [STORY] and suggest editing changes for each emotional beat. Optimize the edit for mobile viewing and strong retention.

423. Attention reset — Variation 2

Create 10 subtle visual attention resets for a talking-head video that do not feel over-edited. Keep the style realistic and avoid excessive transitions or effects.

424. Retention audit — Variation 2

Analyze this transcript/outline [INPUT] and identify 10 points where viewers may lose interest, then propose edits. Include precise timing guidance and a practical workflow for the editor.

425. Ending payoff — Variation 2

Create 5 editing strategies that make the final payoff of [VIDEO] feel satisfying and memorable. Make the result suitable for a professional client deliverable.

426. 3-second hook — Variation 3

Create 20 visual and editorial hooks for the first 3 seconds of a video about [TOPIC]. Make the edit feel premium, natural, and commercially polished.

427. Pattern interrupts — Variation 3

Create 15 pattern-interrupt ideas for [VIDEO] that can be inserted naturally without distracting from the story. Optimize the edit for mobile viewing and strong retention.

428. Retention map — Variation 3

Create a retention map for [VIDEO] showing where to place reveals, questions, B-roll, graphics, emotional changes, and resets. Keep the style realistic and avoid excessive transitions or effects.

429. Cut rhythm — Variation 3

Design a cut rhythm for [VIDEO STYLE] using different shot durations for hook, explanation, climax, and CTA. Include precise timing guidance and a practical workflow for the editor.

430. Open loop edit — Variation 3

Create an editing strategy that introduces an open loop in the first 10 seconds and resolves it near the end. Make the result suitable for a professional client deliverable.

431. Dead-air removal — Variation 3

Create rules for removing pauses, filler words, repeated phrases, and dead air while keeping the speaker natural. Make the edit feel premium, natural, and commercially polished.

432. Emotional pacing — Variation 3

Map the emotional intensity of [STORY] and suggest editing changes for each emotional beat. Optimize the edit for mobile viewing and strong retention.

433. Attention reset — Variation 3

Create 10 subtle visual attention resets for a talking-head video that do not feel over-edited. Keep the style realistic and avoid excessive transitions or effects.

434. Retention audit — Variation 3

Analyze this transcript/outline [INPUT] and identify 10 points where viewers may lose interest, then propose edits. Include precise timing guidance and a practical workflow for the editor.

435. Ending payoff — Variation 3

Create 5 editing strategies that make the final payoff of [VIDEO] feel satisfying and memorable. Make the result suitable for a professional client deliverable.

436. 3-second hook — Variation 4

Create 20 visual and editorial hooks for the first 3 seconds of a video about [TOPIC]. Make the edit feel premium, natural, and commercially polished.

437. Pattern interrupts — Variation 4

Create 15 pattern-interrupt ideas for [VIDEO] that can be inserted naturally without distracting from the story. Optimize the edit for mobile viewing and strong retention.

438. Retention map — Variation 4

Create a retention map for [VIDEO] showing where to place reveals, questions, B-roll, graphics, emotional changes, and resets. Keep the style realistic and avoid excessive transitions or effects.

439. Cut rhythm — Variation 4

Design a cut rhythm for [VIDEO STYLE] using different shot durations for hook, explanation, climax, and CTA. Include precise timing guidance and a practical workflow for the editor.

440. Open loop edit — Variation 4

Create an editing strategy that introduces an open loop in the first 10 seconds and resolves it near the end. Make the result suitable for a professional client deliverable.

Ads & Marketing Videos

441. 30-second ad

Create a complete 30-second advertisement editing plan for [PRODUCT/SERVICE], including hook, problem, solution, proof, offer, CTA, text, music, and SFX.

442. 15-second ad

Create a 15-second paid-social video edit for [OFFER] with a strong first-frame hook and clear CTA.

443. Product commercial

Create a premium commercial edit for [PRODUCT] using hero shots, details, lifestyle footage, typography, music, and sound design.

444. Service advertisement

Create a conversion-focused editing structure for a [SERVICE] advertisement targeting [AUDIENCE].

445. Testimonial ad

Turn this customer testimonial [TESTIMONIAL] into a high-converting video ad with hook, proof, B-roll, captions, and CTA.

446. UGC ad

Create a UGC-style edit for [PRODUCT] that feels authentic while maintaining clean pacing, captions, product visuals, and CTA.

447. Offer reveal

Create a dramatic but professional offer-reveal edit for [OFFER] with build-up, visual emphasis, and final CTA.

448. Problem-solution ad

Create a problem-solution editing blueprint for [PRODUCT/SERVICE] with clear visual storytelling.

449. Retargeting ad

Create a retargeting video edit for people who already viewed [PRODUCT/SERVICE] but did not convert.

450. Multi-format ad

Create versions of the same ad for 9:16, 1:1, and 16:9 while preserving the strongest visual hierarchy.

451. 30-second ad — Variation 2

Create a complete 30-second advertisement editing plan for [PRODUCT/SERVICE], including hook, problem, solution, proof, offer, CTA, text, music, and SFX. Make the edit feel premium, natural, and commercially polished.

452. 15-second ad — Variation 2

Create a 15-second paid-social video edit for [OFFER] with a strong first-frame hook and clear CTA. Optimize the edit for mobile viewing and strong retention.

453. Product commercial — Variation 2

Create a premium commercial edit for [PRODUCT] using hero shots, details, lifestyle footage, typography, music, and sound design. Keep the style realistic and avoid excessive transitions or effects.

454. Service advertisement — Variation 2

Create a conversion-focused editing structure for a [SERVICE] advertisement targeting [AUDIENCE]. Include precise timing guidance and a practical workflow for the editor.

455. Testimonial ad — Variation 2

Turn this customer testimonial [TESTIMONIAL] into a high-converting video ad with hook, proof, B-roll, captions, and CTA. Make the result suitable for a professional client deliverable.

456. UGC ad — Variation 2

Create a UGC-style edit for [PRODUCT] that feels authentic while maintaining clean pacing, captions, product visuals, and CTA. Make the edit feel premium, natural, and commercially polished.

457. Offer reveal — Variation 2

Create a dramatic but professional offer-reveal edit for [OFFER] with build-up, visual emphasis, and final CTA. Optimize the edit for mobile viewing and strong retention.

458. Problem-solution ad — Variation 2

Create a problem-solution editing blueprint for [PRODUCT/SERVICE] with clear visual storytelling. Keep the style realistic and avoid excessive transitions or effects.

459. Retargeting ad — Variation 2

Create a retargeting video edit for people who already viewed [PRODUCT/SERVICE] but did not convert. Include precise timing guidance and a practical workflow for the editor.

460. Multi-format ad — Variation 2

Create versions of the same ad for 9:16, 1:1, and 16:9 while preserving the strongest visual hierarchy. Make the result suitable for a professional client deliverable.

461. 30-second ad — Variation 3

Create a complete 30-second advertisement editing plan for [PRODUCT/SERVICE], including hook, problem, solution, proof, offer, CTA, text, music, and SFX. Make the edit feel premium, natural, and commercially polished.

462. 15-second ad — Variation 3

Create a 15-second paid-social video edit for [OFFER] with a strong first-frame hook and clear CTA. Optimize the edit for mobile viewing and strong retention.

463. Product commercial — Variation 3

Create a premium commercial edit for [PRODUCT] using hero shots, details, lifestyle footage, typography, music, and sound design. Keep the style realistic and avoid excessive transitions or effects.

464. Service advertisement — Variation 3

Create a conversion-focused editing structure for a [SERVICE] advertisement targeting [AUDIENCE]. Include precise timing guidance and a practical workflow for the editor.

465. Testimonial ad — Variation 3

Turn this customer testimonial [TESTIMONIAL] into a high-converting video ad with hook, proof, B-roll, captions, and CTA. Make the result suitable for a professional client deliverable.

466. UGC ad — Variation 3

Create a UGC-style edit for [PRODUCT] that feels authentic while maintaining clean pacing, captions, product visuals, and CTA. Make the edit feel premium, natural, and commercially polished.

467. Offer reveal — Variation 3

Create a dramatic but professional offer-reveal edit for [OFFER] with build-up, visual emphasis, and final CTA. Optimize the edit for mobile viewing and strong retention.

468. Problem-solution ad — Variation 3

Create a problem-solution editing blueprint for [PRODUCT/SERVICE] with clear visual storytelling. Keep the style realistic and avoid excessive transitions or effects.

469. Retargeting ad — Variation 3

Create a retargeting video edit for people who already viewed [PRODUCT/SERVICE] but did not convert. Include precise timing guidance and a practical workflow for the editor.

470. Multi-format ad — Variation 3

Create versions of the same ad for 9:16, 1:1, and 16:9 while preserving the strongest visual hierarchy. Make the result suitable for a professional client deliverable.

Corporate & Business Video

471. Corporate film

Create a professional corporate-film editing plan for [COMPANY], balancing leadership interviews, operations, employees, facilities, B-roll, music, and brand messaging.

472. Company profile

Create a 2-minute company-profile video structure for [COMPANY] with hook, story, services, proof, culture, and CTA.

473. Event highlight

Create a cinematic event-highlight editing plan for [EVENT] with opening, key moments, crowd energy, speaker highlights, and closing.

474. Training video

Create a clean editing workflow for an internal training video about [TOPIC] with chapters, graphics, examples, captions, and clear transitions.

475. Presentation edit

Create an editing plan for a recorded presentation about [TOPIC] using speaker footage, slides, cutaways, captions, and emphasis graphics.

476. Recruitment video

Create an engaging recruitment video edit for [COMPANY] that highlights culture, people, roles, benefits, and employee experience.

477. Executive interview

Create a polished executive-interview edit with multicam cuts, B-roll, lower thirds, captions, and subtle music.

478. Case study video

Create a client case-study video structure showing challenge, process, solution, result, testimonial, and CTA.

479. Brand announcement

Create a cinematic brand-announcement video edit for [ANNOUNCEMENT] with reveal pacing and professional graphics.

480. Internal announcement

Create a concise internal announcement video edit that communicates [MESSAGE] clearly and professionally.

481. Corporate film — Variation 2

Create a professional corporate-film editing plan for [COMPANY], balancing leadership interviews, operations, employees, facilities, B-roll, music, and brand messaging. Make the edit feel premium, natural, and commercially polished.

482. Company profile — Variation 2

Create a 2-minute company-profile video structure for [COMPANY] with hook, story, services, proof, culture, and CTA. Optimize the edit for mobile viewing and strong retention.

483. Event highlight — Variation 2

Create a cinematic event-highlight editing plan for [EVENT] with opening, key moments, crowd energy, speaker highlights, and closing. Keep the style realistic and avoid excessive transitions or effects.

484. Training video — Variation 2

Create a clean editing workflow for an internal training video about [TOPIC] with chapters, graphics, examples, captions, and clear transitions. Include precise timing guidance and a practical workflow for the editor.

485. Presentation edit — Variation 2

Create an editing plan for a recorded presentation about [TOPIC] using speaker footage, slides, cutaways, captions, and emphasis graphics. Make the result suitable for a professional client deliverable.

486. Recruitment video — Variation 2

Create an engaging recruitment video edit for [COMPANY] that highlights culture, people, roles, benefits, and employee experience. Make the edit feel premium, natural, and commercially polished.

487. Executive interview — Variation 2

Create a polished executive-interview edit with multicam cuts, B-roll, lower thirds, captions, and subtle music. Optimize the edit for mobile viewing and strong retention.

488. Case study video — Variation 2

Create a client case-study video structure showing challenge, process, solution, result, testimonial, and CTA. Keep the style realistic and avoid excessive transitions or effects.

489. Brand announcement — Variation 2

Create a cinematic brand-announcement video edit for [ANNOUNCEMENT] with reveal pacing and professional graphics. Include precise timing guidance and a practical workflow for the editor.

490. Internal announcement — Variation 2

Create a concise internal announcement video edit that communicates [MESSAGE] clearly and professionally. Make the result suitable for a professional client deliverable.

Real Estate Video Editing

491. Property walkthrough

Create a premium real-estate walkthrough edit for [PROPERTY] with exterior reveal, entrance, key spaces, amenities, location, and CTA.

492. Luxury property

Create a luxury property video editing plan with slow cinematic pacing, elegant transitions, ambient sound, music, and premium typography.

493. Apartment ad

Create a 30-second apartment advertisement edit highlighting exterior, amenities, interiors, location advantages, and enquiry CTA.

494. Villa video

Create a cinematic villa video edit emphasizing architecture, landscaping, interiors, lifestyle, and premium finishing.

495. Plot layout video

Create an engaging plotted-development video edit showing master plan, roads, amenities, location connectivity, and booking CTA.

496. Drone property edit

Create a drone-video editing plan for a real-estate project with establishing shots, push-ins, reveals, labels, and location graphics.

497. Location highlights

Create a real-estate location-highlights editing sequence showing nearby roads, landmarks, schools, hospitals, shopping, and travel times.

498. Real-estate voiceover

Write a 45-second real-estate voiceover for [PROJECT] covering location, key features, benefits, offer, and CTA.

499. Property Reel

Create a 20-second property Reel editing blueprint with a strong first-frame hook, fast property highlights, captions, and CTA.

500. Before-after property

Create an editing concept showing the transformation of a property/project from construction stage to finished visualization.
